

Speed Limiter

Your personal assistant for speed management

Custom kits made to fit all new and used drive-by-wire vehicles (passenger cars and 12v commercial vehicles)

Gold Speed Limiter: Benefits

- » Safe maximum cruising speed for (commercial 12v) vehicle and passengers
- » Aids employers duty of care to employee drivers
- » Helps prevent speeding tickets (SPECS, city traffic)
- » Concentrated driving with maximum attention to the road
- » Saves fuel
- » Multiple speed limit capability with command module
- » Can be used for road speed or engine speed limiting

Gold Speed Limiter: Features

- » Fixed maximum speed (optional)
- » Variable voluntary speed limits (optional)
- » Sound alert when exceeding set cruising speed (instead of limit, optional setting)
- » Also available combined with Gold Cruise Control GC90

Your personal assistant for speed management

A Gold Speed Limiter is your personal assistant for speed management. If desired, a fixed speed limit can be programmed at installation. In addition to that, drivers can use an (optional) command module to set variable, voluntary limits. You can opt for either kind, but it is also possible to combine fixed and variable limits. Once the set limit is reached, the car will no longer accelerate. A strong push ('kick-down'), however, will allow the car to exceed the set speed (safety).

With a Gold Speed Limiter, you can also opt for a sound alert (instead of the speed being actually limited) upon reaching the desired maximum.

Reliable and certified: a safe product

When you are looking for a comfortable speed limiting solution for your vehicle, you surely want the best: the original John Gold Speed Limiter. Developed by specialists with over 30 years of automotive experience, particularly in cruise control systems. Certified by reputed institutions. Because when it comes to your car, you want the safety offered by a reliable and certified product.
